

NEPTUNE 1000 T SHOWER PANEL ELECTRONIC SHOWER PANEL

SPECIFICATIONS

Touch free electronic shower panel. Operated by IR sensor. Includes a thermostatic mixer for water temperature control for hot and cold water, non-return valves, filters and Thermostop operation at 38°C. With an aluminum panel and WRAS approved Shower Head. Powered by a 9V Battery box or a 9V transformer. The battery box is located behind the panel with easy access. Includes a vandal resistant shower head with easily cleaned silicone nozzles. The water flow will automatically shut off after a factory set flow time of 2 minutes. Flow time is adjustable on site. Includes an adjustable 24 hour hygiene activation.

APPLICATION

The easy touch free activation allows for use by young children, the elderly and the disabled. Ideal for outdoor and indoor applications, retrofit installations, hospitals, hotels, spas, resorts, swimming pools, gyms and private residences.

OPERATION

Default Wave Operation:

Allows activation of the shower once the users place their hands at a close proximity to the sensor. Water will shut off if the users place their hands at a close proximity to the sensor again or once a factory set flow time of 120 seconds will pass. Flow time is adjustable by remote control.

Optional Prox Operation:

Allows automatic activation when the users are within the sensor range, and stops when the users go out of the sensor range.
